The editorial board of the EJMS is aware of various types of research misconduct, like plagiarism, citation manipulation, and data falsification/fabrication. To discourage such research misconduct we will screen, scan, and cross-verify each manuscript manually and with the help of software as well. In case of any research misconduct, the editorial board of EJMS will follow the COPE's guidelines in dealing with the allegations of misconduct.

**Policy of EJMS for any Sort of Research Misconduct:**

The editorial board of the Europasian Journal of Medical Sciences (EJMS) will not accept manuscript with plagiarism in any form. We have established the following policy stating specific actions (penalties) when any sort of research misconduct is identified in an article that is submitted for the publication in the EJMS. Every manuscript submitted to the EJMS must be original, unpublished, and not even pending for the publication in other journals. Any text with someone's view, idea, findings should be explicitly acknowledged and any photograph, figure and graphic material reproduced from another source should be presented with permission from the person or copyright holder.

**Plagiarism Policy**

The plagiarism is an act of copying someone's theories, ideas, or statements without giving the explicit acknowledgement to the author of the original source. It is assumed unethical in scientific writing. Any text with someone's view, idea, findings should be explicitly acknowledged and any photograph, figure and graphic material reproduced from another source should be presented with permission from the person or copyright holder. The editorial board of the EJMS will not accept manuscript with plagiarism in any form. We have established the following policy stating specific actions (penalties) when plagiarism is identified in a manuscript that is submitted for the possible publication in the EJMS.

**Identification of Plagiarism and Penalties**

The EJMS has owned iThenticate Plagiarism Checking Software powered by Turnitin for checking possible plagiarism of all submitted manuscript. On the basis of extent of the plagiarism, the editorial team will decide whether to accept the manuscript and proceed for the further peer-review process or reject the manuscript from the editorial
desk. Once the plagiarism is identified, the Section Editor will warn the author with its future consequences, and ask to revise the manuscript converting the plagiarized content into the unique one. If the authors don’t correct it, the editorial board will take action on the basis of the degree of plagiarism under the following guidelines.

1. **Plagiarism Offense Type I (Minor Offense):** If some portion (less than two complete paragraph or less than 15% of the total content) of any article is plagiarized without significant data or idea, then it is assumed to have minor plagiarism offence.
   **Penalties:** The last warning with the possibilities of penalties of type II and type III offence is given to the author(s) and asked to resubmit the manuscript after rewriting the plagiarized contents of the manuscript with proper citation of the original article.

2. **Plagiarism Offense Type II (Intermediate Offense):** If a significant portion (more than two complete paragraph or less than 25% of the total content) of any article is plagiarized without significant data or idea, then it is assumed to have intermediate plagiarism offence.
   **Penalties:** The submitted article is rejected and the author(s) is/are not allowed to resubmission of the manuscript at least for one year.

3. **Plagiarism Offense Type III (Severe Offense):** If a significant portion (more than 25% of the total content) of any article is plagiarized with significant data or idea, then it is assumed to have severe plagiarism offence.
   **Penalties:** The paper is rejected and the author(s) is/are kept in blacklist for 3 to 10 years of time depending on the severity of the plagiarism.
