APC (Article Processing Charges)
We don’t charges for articles submission, processing, and publication (both online and print). There is no surcharges based on the length of an article, figures or supplementary data. The other items like editorials, corrections, addendums, retractions, comments, etc. are also published for free in EJMS.

The cost of turning a manuscript into a finished article, and publishing the article in online as well as print version as well as the costs of hosting, indexing, distributing and promoting the journal is maintained by publisher and editors voluntarily without taking the article processing fee (APF).

Subscription Fee
All academic editors who perform the editorial screening to final decision making, reviewers who perform the quality peer-review, and technical editors who perform the technical and ethical checks, and convert the manuscript to a professionally typeset article are working voluntarily.

As EJMS is published both in online and print version, costs are involved in every stage of the publication process, from web-hosting the published article on dedicated servers to printing the hard-copy of each issue published. To manage all these costs, EJMS has provisioned a subscription fee for individual subscribers and for libraries. The author can buy the printed hard copy of any specific volume of the journal or can subscribe annually for the personal record or request the institute or libraries to subscribe to the journal in annual basis. Our subscription fee schedules for print copy are as follows; (this subscription fee is not mandatory, and the author(s) can donate to the journal too if they like to support the journal)

**Individual Subscription fee:**
National Author: NPR 1,000 (per copy); International Author: US $ 150 (per copy)

**Institutional Subscription fee:** National: NPR 5,000 (per year); International: US $ 500 (per year)
